Table of contents

1. Introduction 1

1.1. Situating the need for watermarking and image registration 2

1.2. The problem 3

1.3. The assignment 4

1.4. Objectives 4

1.5. Organisation of the report 4

2. Watermarking 6

2.1. History and explanation of a "water mark" 7

2.2. Watermarking: terminology and requirements 7

2.3. Applications of watermarking 9

2.4. General overview of techniques to embed a watermark 11

2.4.1. Classification and methods for video and image watermarking 12

3. Image registration 14

3.1. Definition of image registration 15

3.2. Applications of image registration 16

3.3. Methods for image registration 17

3.3.1. Correlation based methods 18

3.3.2. Algorithms working in the frequency domain 19

3.3.3. Feature based methods 20

3.3.4. Methods based on elastic deformation 21

4. Image registration algorithm 22

4.1. Motion vector calculation 23

4.1.1. Algorithm 23

4.1.2. Matlab implementation 26

4.1.3. Results 27

4.2. First attempt to estimate transformation 30

4.2.1. Description of algorithm 30

a) Solution one 31

b) Solution two 36

4.2.2. Results 40
4.2.3. Extracting the right information out of the obtained data 41
4.2.4. Possible reason for failure of algorithm 43
4.3. Second attempt to find the transformation 45
4.3.1. Principle 45
4.3.2. Results 45
4.3.3. Extracting the right parameters 48
4.4. Solution for obtaining the parameters of the transformation 48
4.4.1. Algorithm 48
4.4.2. Matlab implementation 51
4.4.3. Results 51
a) Shift 52
b) Rotation 52
c) Shear 60
4.5. Restoring the image 61
4.5.1. Matlab implementation 62
4.5.2. Results 64
5. Implementation on reconfigurable computing platform 65
5.1. Description of SONIC 66
5.1.1. The SONIC principle 66
a) Buses 67
b) PIPEs 67
5.1.2. Hardware description of ULTRA-SONIC 68
a) Board itself 68
b) PIPEs 69
c) FPGA used on PIPE 71
5.2. Structure of hardware implementation 72
5.3. Motion vector calculating PIPE 73
5.3.1. Package 74
5.3.2. Block 74
5.3.3. Test bench 85
5.3.4. Results and synthesis 86
5.4. Image registration PIPE 90
5.4.1. Package 90
5.4.2. Block 91

5.4.3. Test bench 98
5.4.4. Results and synthesis 98

6. Conclusions 102

7. References 105

8. Appendices 111

8.1. VHDL of motion vector block 112

8.1.1. Package 112
8.1.2. Block 113
8.1.3. Test bench 129

8.2. VDHL for image registration PIPE 136

8.2.1. Package 136
8.2.2. Block 137
8.2.3. Test bench 165
